EDUCATION

Queen Mary University of London – BSc Computer Science *Sept*

2025 – June 2028

- **Relevant modules:** Programming Fundamentals (Java), Computer Systems (Logic & Digital Design), Databases, Data Structures and Mathematics

The New Tulip International School - Higher Secondary Certificate in India or A-levels in the UK

April 2024 - March 2025

- Achieved: 82% overall
 - Key subjects: Physics (85), Mathematics (80), English (89)
-

EXPERIENCE

- **Student Consultancy Project with IPSOS, Queen Mary University of London**

- Researched competitor and customer research and helped present recommendations to improve the client's marketing and customer experience.

- **Hackathon Participant – Diverse AI Hackathon**

- Developed an AI-powered assistant to answer user questions about heat pump energy, efficiency and usage using a huge data set, cloud APIs, and AI.
- Collaborated in a diverse team of 6 to design, develop, and demo a working solution; delivered a live presentation to judges.

- **IBM Climate Action Week Hackathon**

- Collaborated in a 6-person team to design prototype/idea WasteWise, an AI-powered app tackling UN SDG 12 by scanning barcodes for recycling guidance, suggesting anti-waste recipes, and gamifying habits with points/leaderboards.
-

PERSONAL PROJECTS

- **CRUD Application in Java (JDBC)**

- Designed and implemented a data management app supporting create, read, update, and delete operations. Integrated the app with a relational database using JDBC and MySQL.

- **Chocolate Chilli – Java Game**

- Designed and developed “Chocolate Chilli”, a Java game in a Jupyter-based environment where the user plays against the computer.
- Implemented game logic, input handling and a simple code to manage turns, scoring and win/loss conditions.
- Added a basic learning mechanism so the computer updates its strategy after each loss, becoming harder to beat over time.

- **Responsive Portfolio - HTML, CSS, Javascript, PHP, and MySQL**

- Developed a responsive personal portfolio website with dynamic features including user login and a blog page.
- Implemented back-end functionality using PHP and MySQL for data storage and user authentication.
- Structured the website with dedicated sections for About Me, Awards, and project highlights to present information clearly.

- **Typing Race Simulator - Java with Swing**

- Built a GUI-based typing race simulator using Java Swing.
- Developed the user interface and core logic for typing input, progress tracking, progress bar between players, and many more.
- Focused on creating an interactive desktop application with a clear and responsive layout.

CERTIFICATIONS

- Oracle Java SE 8(100%) – June 3, 2024
- Oracle Cloud Generative AI Certified(97.5%) – July 22, 2024
- Oracle Cloud Data Management(78.2%) – August 10, 2024
- Oracle AI Vector(80%) – August 25, 2025
- Oracle Fusion Cloud Applications HCM Process Essentials Certified(76%) – May 31, 2025
- Student Consultancy Project – Queen Mary University of London
- IBM - Web Development Fundamentals – January 1, 2026

SKILLS

- Programming Languages : C, C++, Java, Python, Tablue, HTML, CSS, Javascript, PHP, SQL, PL/SQL
- Developer Tools: VS Code, MySQL, GIT, Linux, AWS(Amazon Web Services)
- Soft Skills: Teamwork, Time Management, Problem-Solving, Editing

AWARDS

- INDIA BOOK OF RECORD - September 23, 2024
- DUBAI LEADERSHIP FEDERATION - April 18, 2024

EXTRACURRICULAR ACTIVITIES

- **Technical Speaker – Microsoft HoloLens 2**
 - Delivered a seminar on Microsoft HoloLens 2 to an audience of 150+ attendees at Himatnagar Seminar Hall, Gujarat.
 - Simplified complex AR/VR concepts into accessible language.
- **Public Speaking – Career Goals Speech**
 - Presented a 4-minute talk on career goals to 100+ attendees at Dipti Shah's Institute. Recognized by institute staff for clarity and confidence in delivery.
